Tools & Technologies ☎ Git, GitHub, Postman, REST APIs, JSON,

## Projects

FoodStore | React js, Tailwind, Express, MongoDB | [Link](#)

July 2024-Sept 2024

**FoodStore** is a modern web application that allows users to browse and order food from a wide variety of Restaurants

- Built a responsive user interface using **React.js** and Tailwind CSS, enhancing user experience across devices. Boosted page performance through lazy loading and code splitting, decreasing initial load time by 15%.
- Developed restaurant profiles displaying essential details (name, address, ratings, reviews, delivery times, contact info).
- Implemented dynamic menu management features with JavaScript and Jotai, improving order efficiency.
- Integrated **Stripe payment** gateway for secure credit/debit card transactions, achieving 100% uptime during checkout processes
- Built a Node.js and MongoDB backend to manage user orders.

Netflix-Gpt | React Js, Tailwind, Firebase, RTK | [Link](#)

Dec 2023-Feb 2024

**NetflixGPT** is an AI-powered movie and TV show recommendation web-application platform that combines the vast content library of Netflix with the intelligence of GPT.

- Designed an intuitive UI with React Router, improving user navigation.
- Integrated **TMDB API** to fetch real-time movie data, enriching content with accurate descriptions, ratings, and genres.
- Developed movie sections with cast details, related titles, and recommendations enhancing user interaction by 20%.
- **Leveraged OpenAI GPT** for personalized movie recommendations, enhancing user experience by 25%.

## Certification

Frontend Developer (React) - HackerRank

October, 2024

Demonstrated proficiency in React fundamentals, including component-based architecture, state management, hooks, and API integration. [View Certificate](#)

React JS Tutorial - Great Learning

October, 2024

Comprehensive understanding of React concepts, including JSX, components, props, and lifecycle methods.

[View Certificate](#)
